### The Shower Head

The average household shower expels approximately 15 litres of water per minute. A shower that has a water saving shower head fitted will expel approximately 9 or 10 litres per minute. Changing your normal non-energy efficient shower head to our energy efficient shower head can save you water, electricity and money every month.

Water is precious. Use it wisely. With the Ellies Water Saving range start saving water, energy, money and help lay the foundation for a healthier planet.
